Software

Bowl'A'Coin software is built on the best and most secure technology and with one of the fastest Blockchain on the market with the help of smart contracts.

With our software users can, from their computer or APP, sign up at no cost, play games, set up challenges with others worldwide. At the same time users can go to any real Bowl'A'Coin bowling alley, login and start playing alone or challenge their friends from any bowling alley that is connected to the software.

Each game you play, both you and the bowling alley will be rewarded with GOLD point.

The bowling alley GOLD points will go into a monthly jackpot or other contest.

The bowling alley can also setup tournaments between their own alley and another bowling alley using the Bowl'A'Coin software.

The bowling alleys also have the option to advertise on the web and games with their local offers.

Even Restaurant/Cafe owners can join the ECO-system, start accepting BAC token and use the advertising service to promote their business.

All locations signed in to the software ECO-system will also accept payment in BAC tokens on their products.

With this software we can create the world biggest tournaments as we played in the same bowling alley
